Says Reds Flood U. S. With Tons Of Propaganda

Dr. Bela Fabian, chairman of the Federation of Hungarian Former Political Prisoners, charged yesterday that the Kennedy administration has given the green light to shipment of tons of Communist propaganda.

He said that before the new Administration took office, United States Customs officials stopped bulk shipments of Communist propaganda. The addressee was asked if he wanted it. If he did, he received it. If not, it was destroyed. With controls lifted, he said, an "unabated bombardment" of literature is reaching the country.

Dr. Fabian said at a press conference at the Free Baltic House, 131 E. 70th St., that seventeen tons of Communist propaganda literature passed through San Francisco in a week in 1960. In a recent year, he asserted, 7,000,000 pieces of similar literature passed through the New York Port of Entry.

Refugees and persons with relatives behind the Iron Curtain have been among recipients. Dr. Fabian said the Soviets spent more money on the subversion of United States citizens and residents than the United States spends on propaganda throughout the world.
